

Bi-directional ESD Protection Diode

DFN1006

TESDL24VB17P1Q1 is a unique design with proprietary clamping cells in a small package. The DFN1006 package size is 1.0 mm x 0.6 mm and the thickness is only 0.5 mm, which can meet the needs of new products for small packages. During transient conditions, the proprietary clamping cells prevent over-voltage on the control/data/power lines, protecting any downstream components.

Applications

- Battery contacts
- Power management system
- Portable devices
- Digital cameras
- Digital frames
- Cellular handsets and accessories
- Notebooks, desktops and servers
- Microprocessor-based equipment
